-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Detailed Action**

1.) The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2.) Claims 11-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 11 is an incomplete sentence and does not make sense. The last part of the claim is missing, apparently due to a typing error. The other claims are inadequate under 35USC112 in that they depend from claim 11.

3.) The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4.) Claims 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Denis (3,810,790) taken with Hooke (4,322,597). Figure 3 and the discussion thereof in column 2 of the patent to Denis (3,810,790) disclose a method a method for manufacturing a battery pack including resistance spot welding strap 11 between two cells whereby one welding electrode 15 is outside the welding area. The claims differ from Denis (3,810,790) in calling for disposing the cells in a housing. This difference does not patentably distinguish over the prior art. It would

Art Unit: 1725

have been obvious to have placed the cells in Denis (3,810,790) in a housing, the motivation being the teachings of Hooke (4,322,597) that such is advantageous (see element 20 in figure 8 of Hooke (4,322,597)), thereby satisfying the claims. In regard to the allusions to a “side” of the cell in claim 12 and to a “periphery” of a cell in claim 13, the language is broad enough to read on the positioning of electrode 15 in figure 3 of Denis (3,810,790).

5.) The patent to Alexandres (5,298,712) is cited to show a prior art method of welding battery cells.
